

Principles of Scientific Writing

Last modified: 2026-10-10 12:05:17 (PDT)

Preface

This website presents my perspective on writing in science, technology, engineering, and mathematics (STEM), with a focus on writing about statistical data analysis. Most of its rules also apply to informative prose in general. I intend to give it to academic mentees as a style guide reference, and also use it as a notebook for myself.

The [Introduction](#) describes the book's scope and readers, and how to use its chapters. The [Summary](#) lists the book's main rules as a checklist for revising a draft.

Acknowledgments

The site is built from the [qwt](#) Quarto website template, whose structure comes from the [UCD-SERG lab manual](#), which is in turn adapted from the [Benjamin-Chung Lab Manual](#).
